OVERVIEW

The University of Miami School of Law specifically designs its summer study abroad programs to be the best situated, longest, most comprehensive and most inclusive. Each of our programs offers a unique education/travel experience visiting many exciting destinations in cooperation with Contiki Holidays, the world's largest travel company for 18-35 year olds. Housing and classroom for all programs will be in Superior Tourist Class Hotels. In Greece, some classes will be conducted aboard a cruise ship. An exciting array of special events and guided tours are included at program expense.

The 2010 Summer Abroad Programs consist of two sessions. Each session contains two segments. Each segment is unique. A single 3-credit course is offered in each of the four segments. A maximum of six credits will be awarded. Courses are designed to offer students an appreciation of the inter-relationship of legal systems and cultural aspects that will help them become a successful attorney in the 21st century.

Students may enroll solely in any one of the four segments offered in Session 1 or Session 2. However, to obtain the full benefit from total emersion in the summer study of law abroad education/travel experience presented by the University of Miami School of Law, students are strongly encouraged to enroll in one segment in Session 1 and one segment in Session 2. Students who enroll in segments in both sessions will truly have experienced the sights, sounds, and smells of Europe!

Students must make their own air travel arrangements to and from their program segment selection(s) to participate.

All courses are taught by faculty from the University of Miami School of Law.
